Yes

Daily Status Report for Tuesday September 18, 2012

Work Completed Today:

Single Beam Survey

Due to the weather today GBA did not take the small skiff onto the water, but took advantage of the higher than normal tide and used the multi beam survey boat (Sea Fix) to survey today. They surveyed in the RM 1.80 to the RM 3.05 area.

Did the CPG have a Gahagan and Bryant survey boat working near the UPF this past Tuesday?

Thanks
